WHAT WE DO

Product engineering, digital transformation, and enterprise automation

We act as a complete technology partner for businesses looking to modernize operations and scale digitally.

PILLAR 01

Product Engineering & Digital Transformation

Custom Software, Web & Mobile Apps

Tailored development across modern frameworks to solve unique business challenges and support digital scale.

UI/UX Design & MVP Development

Fast-tracking concepts from prototype to production with user-centric product design and clean engineering.

E-Commerce & CMS Infrastructure

Robust storefronts, content platforms, admin systems, integrations, payments, and scalable cloud delivery.

PILLAR 02

Enterprise Solutions & Automation

HRMS & Operational Tools

Systems built to streamline workforce management, automate departmental tasks, and improve performance.

CRM & Business Process Automation

Tailored platforms to eliminate manual bottlenecks, optimize workflows, and drive revenue growth.

AI Assistants & Internal Copilots

Customer support agents, internal knowledge bots, document assistants, and smart automation workflows.

OUR PROCESS

From idea to deployed business system

A structured delivery model for startups, SMEs, and enterprises that need clarity, speed, and production quality.

1

Discovery & Digital Readiness Audit

Clear deliverables, measurable progress, and practical technical execution at every stage.

2

Solution Architecture & Roadmap

Clear deliverables, measurable progress, and practical technical execution at every stage.

3

UI/UX Prototype and MVP Planning

Clear deliverables, measurable progress, and practical technical execution at every stage.

4

Full-Stack Product Development

Clear deliverables, measurable progress, and practical technical execution at every stage.

5

AI / CRM / HRMS / CMS Integration

Clear deliverables, measurable progress, and practical technical execution at every stage.

6

Deployment, Training and Optimization

Clear deliverables, measurable progress, and practical technical execution at every stage.

INDUSTRIES

Digital systems for growing businesses

OBM specializes in business systems where automation, dashboards, customer communication, secure portals, and scalable software create immediate operational value.

PACKAGES

Flexible development and automation plans

Start with a focused audit or move directly into a complete product build.

Digital Starter

Best for businesses planning software, website, or automation modernization.

From QAR 4,500

- 🕒 Digital audit
- 🕒 Workflow analysis
- 🕒 Technical roadmap
- 🕒 Prototype recommendation

Most Popular

Product Build

Best for MVPs, web apps, portals, dashboards, CRM, CMS, and e-commerce systems.

From QAR 25,000

- 🕒 UI/UX design
- 🕒 Full-stack development
- 🕒 Admin dashboard
- 🕒 Cloud deployment
- 🕒 Basic automation

[Request Proposal →](#)

Enterprise Automation

Best for HRMS, CRM, AI assistants, advanced workflows, and multi-department systems.

Custom Quote

- 🕒 Custom architecture
- 🕒 Private data integrations
- 🕒 Role-based access
- 🕒 Advanced analytics
- 🕒 Priority support
